armourdog[®] Retail Case for Lenovo ThinkPad 10

ADASH093

Specifications

Height	260mm
Width	183mm
Depth	25mm
Weight	199g
EAN/UPC	5060329432277

Materials

Exterior	EVA / polyurethane
Inner	Microfibre
Colour	Black with red inner

Description

The armourdog[®] Lenovo ThinkPad 10 tablet retail case has been designed to allow unrestricted access to the advanced functionality of the Lenovo ThinkPad 10 tablet while offering all-day protection against knocks, bumps and drops. Weighing in at under 200g, this unobtrusive and lightweight cover gives the full tablet experience – important to those in a customer facing environment such as retail, meeting-and-greeting, queue busting etc. The four rear-mounted d-rings allow the adjustable shoulder strap to be coupled in a vertical or horizontal arrangement. The integrated rear hand straps offer comfortable portrait or landscape usage for both for left and right-handed staff. The external material is a textured, non-slip polymer with an EVA threaded rear panel to shield the ThinkPad against knocks and drops. A clever, magnetic panel on the rear folds open to allow the ThinkPad 10 to be inserted into a Lenovo ThinkPad 10 docking station without removing the tablet from the case.

We pride ourselves in the top quality materials and manufacturing process we use, which is why all armourdog[®] products are backed with a 2 year manufacturing defect warranty.

Features

- Retains the ThinkPad 10 functionality while adding security and protection
- Adjustable shoulder strap with four anchor points on the tablet case
- Cut-outs for all ports, camera, speakers, and fingerprint scanner
